## Join the ACE Academy

Instructor-Led Trainings and On-Demand Trainings

### ACE Academy

The Aviatrix Certified Engineer (ACE) Program is the industry's leading multicloud networking certification. Its comprehensive trainings and specialized courses provide a deep understanding of how to build, operate, automate, scale, and secure cloud networks across Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP), and Oracle Cloud Infrastructure (OCI). The ACE Program equips participants with best practices that span all major cloud providers.

# Prerequisite, Expectations & How to get Certified

## Prerequisite:

- ACE Associate is required. ACE Professional is highly recommended.

## Expectations:

- The focus is on gaining familiarity with tools at your disposal for troubleshooting real-world Day 2 cloud issues. This is NOT a Build/Design training (please refer to the ACE PRO training).

## How to get Certified:

1. Create Aviatrix ACE Academy Account: <https://ace.aviatrix.com>
2. A Subset of Aviatrix use cases will be discussed (these are meaningful use cases collected from real scenarios)
  - There are **8** Labs that you will have to complete (an automated script will evaluate the completion of all labs). PODs will be torn down as soon as the training has been completed.
3. Attend the entire course.
4. On day 2, you will work on another dedicated pod (i.e., *"Let's troubleshoot"* POD), where you will be presented with several failures. The objective is to identify and fix the failures using the Aviatrix platform tools.
5. Complete the Survey.

❑ Recordings are not distributed, nevertheless, the slides will be shared

**Certification will be then delivered after approximately seven business days!**
