POD & Lab Guides

Personal POD access details and 8x walkthrough Labs

<https://docs.aviatrixlab.com/ace-ops/docs/home.html>

Prerequisite, Expectations & How to get Certified

Prerequisite:

- ACE Associate is required. ACE Professional is highly recommended.

Expectations:

- The focus is on gaining familiarity with tools at your disposal for troubleshooting real-world Day 2 cloud issues. This is NOT a Build/Design training (please refer to the ACE PRO training).

How to get Certified:

1. Create Aviatrix ACE Academy Account: <https://ace.aviatrix.com>
2. A Subset of Aviatrix use cases will be discussed (these are meaningful use cases collected from real scenarios)
 - There are **8** Labs that you will have to complete (an automated script will evaluate the completion of all labs). PODs will be torn down as soon as the training has been completed.
3. Attend the entire course.
4. On day 2, you will work with other participants on another dedicated pod (i.e., *"Let's troubleshoot together"* POD), where you will be presented with several failures. The objective is to identify and fix the failures using the Aviatrix platform tools.
 - Demonstrate a collaborative approach (it is NOT mandatory to resolve all failures 😊).
5. Complete the Survey.

- ❑ Recordings are not distributed, nevertheless, the slides will be shared
