

Internet Egress close to the Applications

Aviatrix DCF for Secure Egress

### **Problem Statement**

#### Private workloads need internet access

SaaS integration

Patching

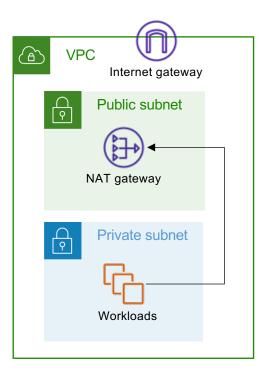

Updates

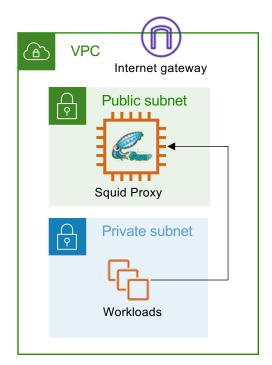

#### **NAT Gateway**

- NACLs are necessary
- Unrestricted access

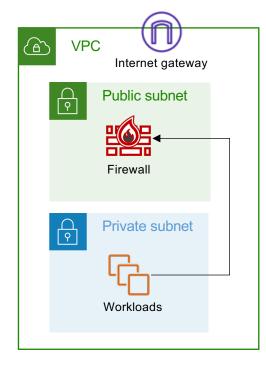

#### **Squid Proxy**

- Hard to manage
- Scale and HA issues

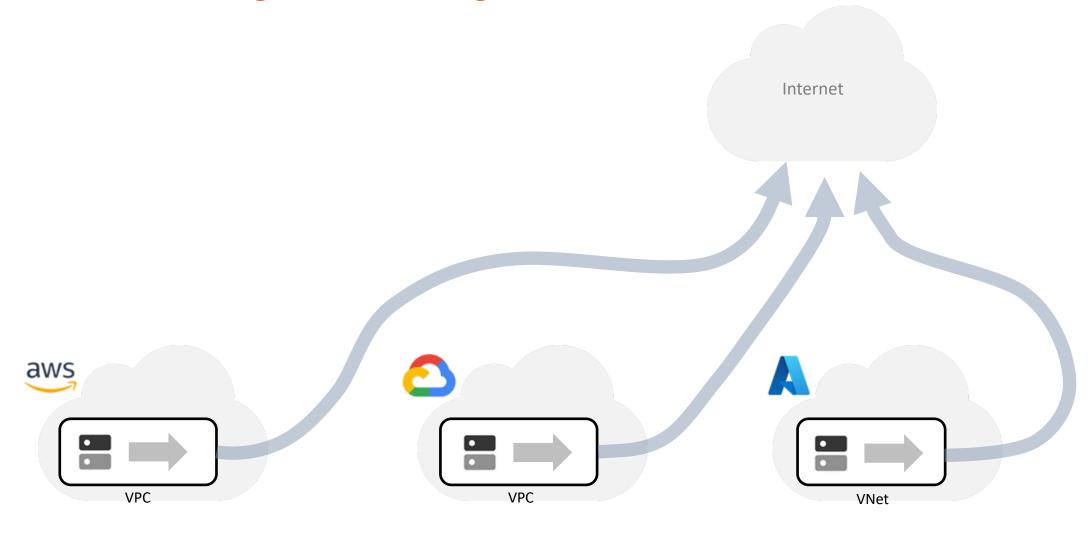

#### **Layer-7 Firewall**

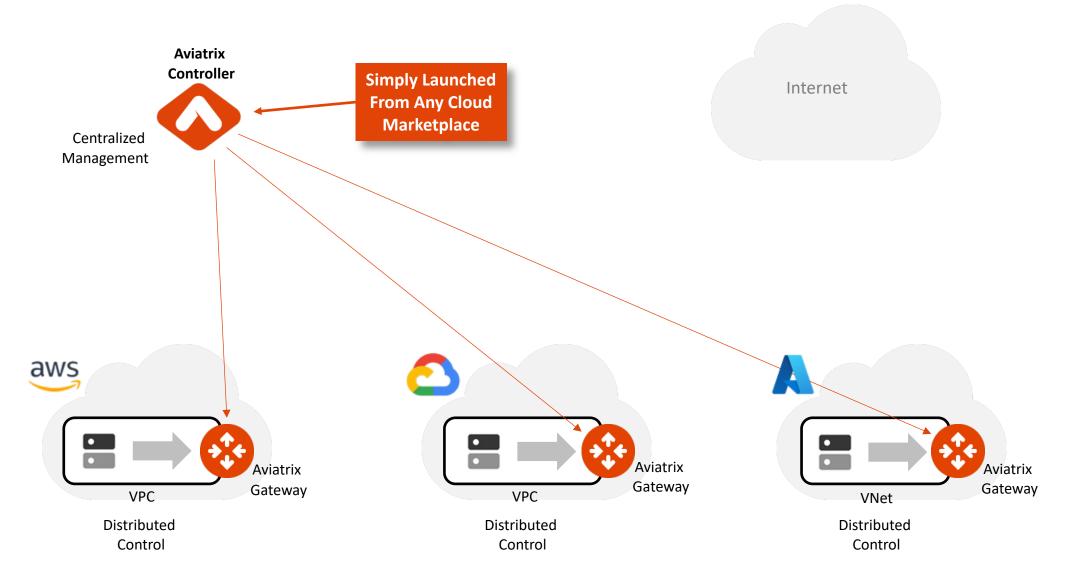

- Overkill
- Expensive

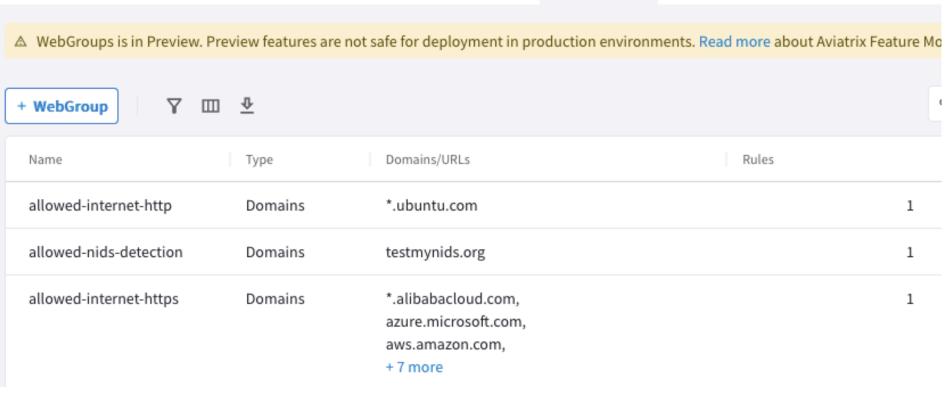

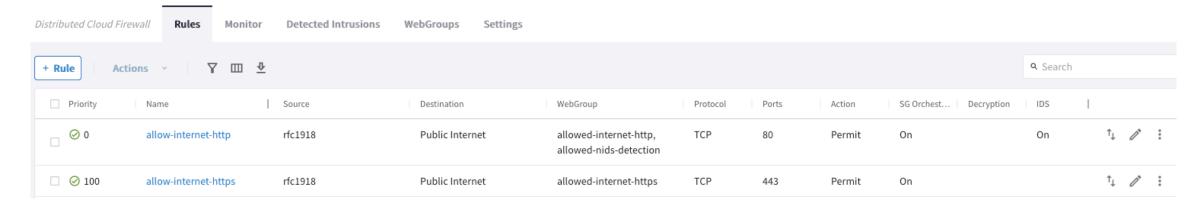

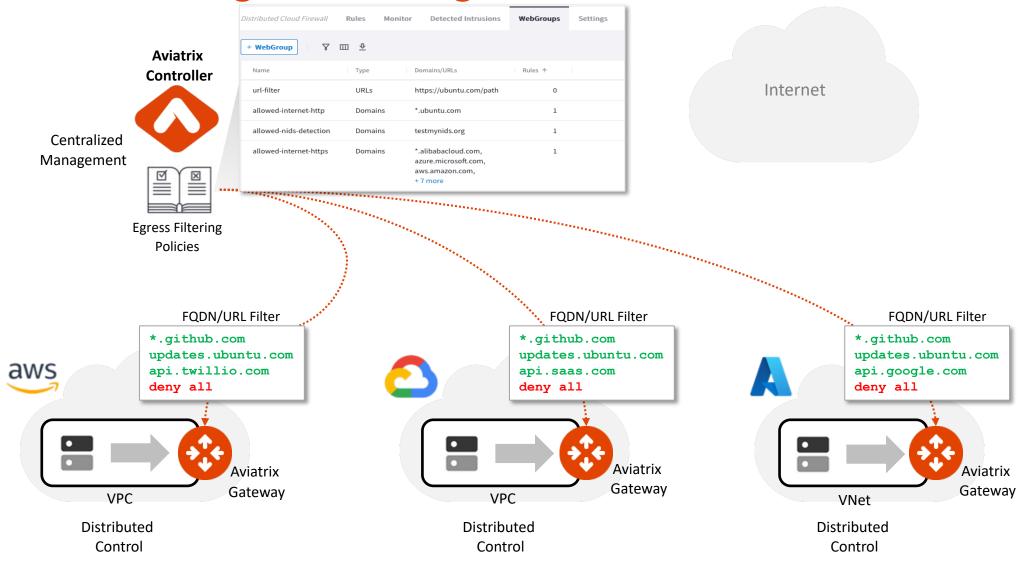

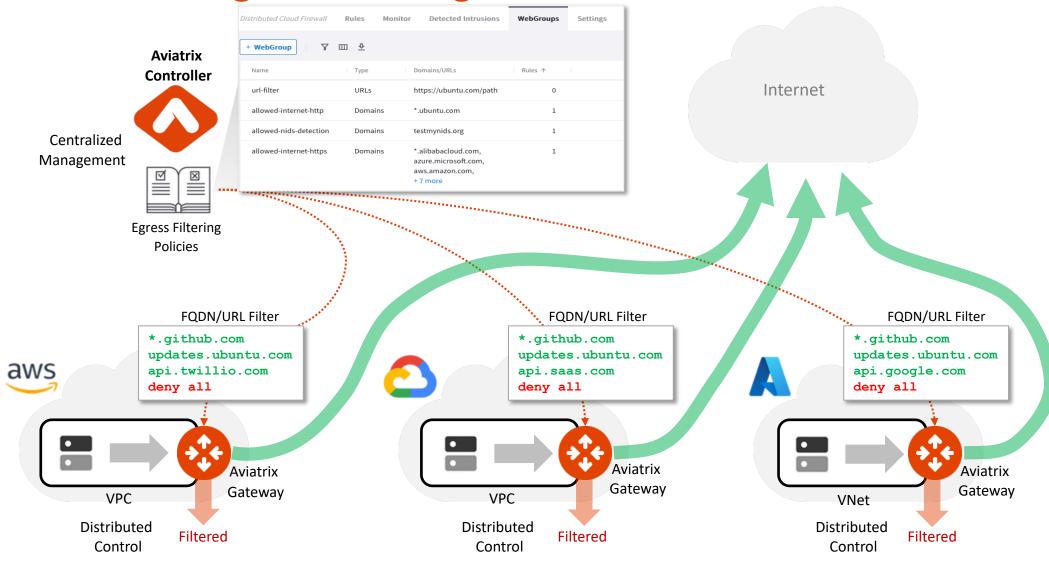

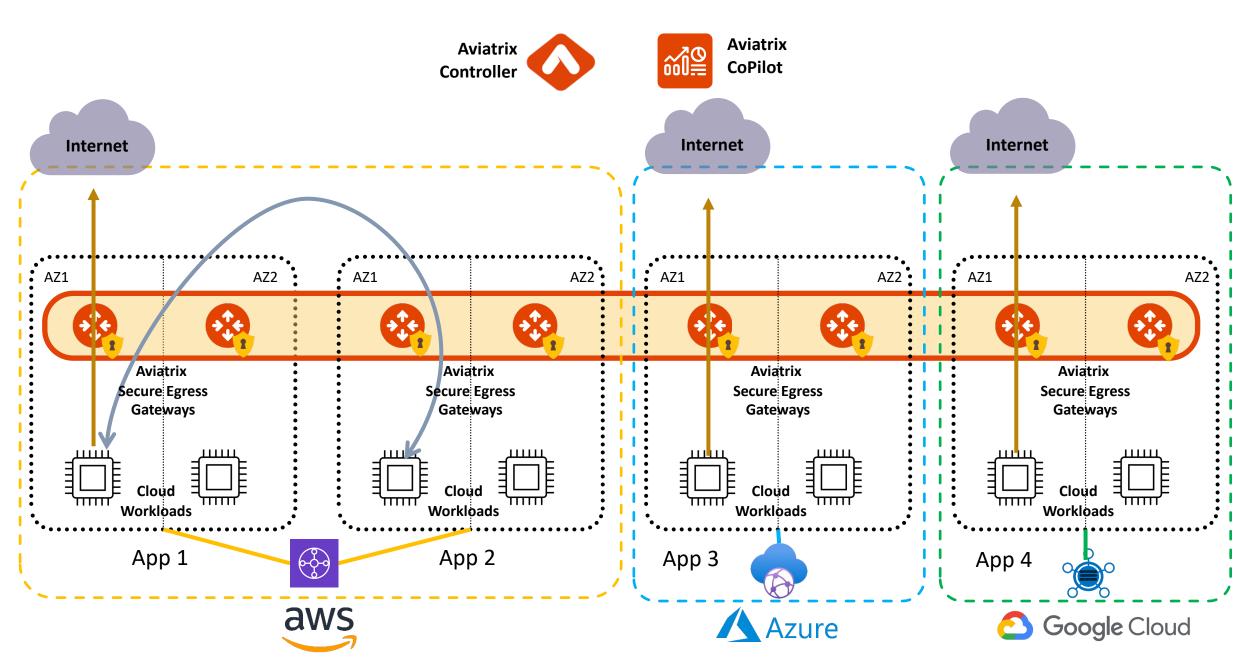

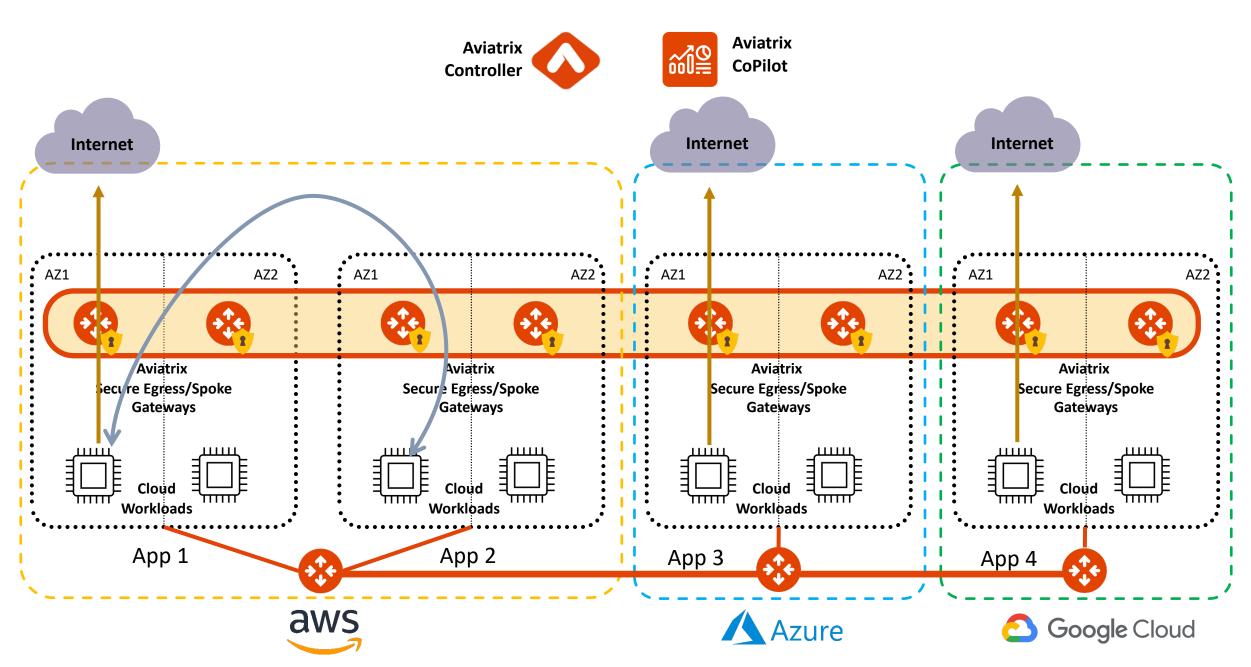

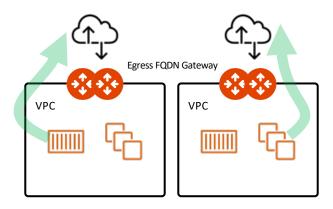

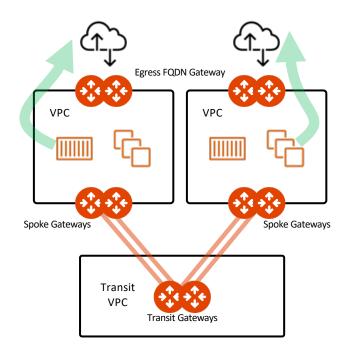

## Aviatrix Secure Egress Filtering Design Pattern

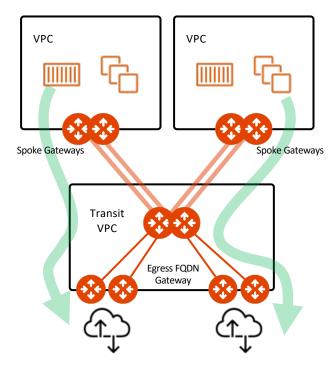

# Local Egress FQDN Filtering (Distributed)

# Local Egress FQDN Filtering (Distributed) with Aviatrix Transit

# Centralized Egress with Aviatrix Transit

## **Enable Egress**

- Adding Egress Control on VPC/VNet changes the default route on VPC/VNet to point to the Spoke Gateway and enables SNAT.
- Egress Control also requires additional resources on the Spoke Gateway.
- In addition to the Local route, the three RFC1918 routes, also a default route will be injected.
